About the course ?

Scan QR to Visit Website

TAM has been created by Professional Chartered Accountants

We go to college to acquire-KNOWLEDGE, but, "Knowing is not the same as Doing".

This is why so many graduates pass out of college but are not able to get jobs. At the same time we keep hearing the term "Unemployable" in financial publications and amongst HR professionals.

The reason for this is that the ability to **DO WORK**, is not taught at any college. TAM has been designed to fill this GAP by providing the practical skills to be able to work.

TAM is meticulously curated to enable each successfully certified candidate to be able to do the work required of an Accountant/ Commercial Executive/ Tax Professional/ Financial Analyst.

An **Internship** is provided for a real time job experience for exposure under coaches who are themselves employed and working.

Information technology exposure for expertise required of an Accountant including use of **Artificial Intelligence** is covered in the course as a supplementary training to provide the best of skills to each students.

The **Professional Edge** module ensures that each candidate passing out is well equipped to crack the toughest of job interviews.

Who should do the course ?

TAM is the best vocational training for empowering any candidate with essential skills in Finance/ Tax and Accounts. It is recommended for BCom/ MCom/ BBA and MBA Graduates. It is equally suitable for working professionals seeking practical knowledge - because Money Management, Information Management and Human skills are essential for one and all to learn.
